X-PPL 2023 - Presentations

September 19, 2023

Schedule to follow shortly.

Talks

Agreement attraction in Hebrew comprehension: The effect of word order
Aviv Azar and Aya Meltzer-Asscher

Are syntactic dependencies optimized for periodic neurobiological sampling? Large-scale analysis on the Universal Dependencies corpus
Chia-Wen Lo, Mark Anderson, Lorenzo Titone, and Lars Meyer

The effect of morphosyntactic ergative construction on pronoun processing in Georgian
Dato Abashidze and Natalia Gagarina

Correlates of Infant Pointing Frequency in the First Year
Ebru Ger, Aylin Küntay, Sura Ertaş, Sümeyye Koşkulu, and Ulf Liszkowski

HuMaze - Testing Hungarian Relative Clause Processing in the Maze-Task
Eszter Ronai and Wesley Orth

Two types of definites - cross-linguistic experimental study
Florian Schwarz, Agata Renans, Hasiyatu Abubakari, Dorothy Ahn, Fenna Bergsma, Nattanu Chanchaochai, Reginald Duah, Imke Driemel, Geist Ljudmila, Mira Grubic, Sampson Korsah, Suet-Ying Lam, Cecile Meier, Yağmur Sağ, Ankana Saha, Radek Šimík, and Alexandra Simonenko

Similarity-based interferences in Chinese classifier-noun Dependencies
Hailin Hao, Zuzanna Fuchs, and Shravan Vasishth

Producing case in Shipibo-Konibo: Ergativity and uncertainty
Caroline Andrews, Roberto Zariquiey, Sebastian Sauppe, Albert Maroto, Erlich Mori, Margarita Rodríguez Flores, Glendy Rosario Sanchez Diaz, and Balthasar Bickel

Beyond dichotomies in language and memory: The case of Icelandic
Iris Nowenstein and Sigríður Sigurjónsdóttir

Agrammatic Aphasia in a Polysynthetic Language: The Case of West Greenlandic
Johanne Nedergaard, Mads Nielsen, and Kasper Boye

Neural bases of subject preference in Austrian Sign Language (ÖGS)
Julia Krebs, Evie Malaia, Ronnie Wilbur, and Dietmar Roehm

Grammatical and non-grammatical constraints in cataphora resolution in English and Chinese
Jun Lyu

Grammatical gender is reflected in languages' distributed semantic representations
Luca Onnis and Alfred Lim

Processing Reflexive Pronouns in Sinhala
Malkini Chandrasiri and Shayne Sloggett

Intonation Units in spontaneous speech evoke a neural response beyond speech acoustics
Maya Inbar, Shir Genzer, Anat Perry, Eitan Grossman, and Ayelet Landau

Getting creative: A Language Modeling approach to predicting child utterances in 12 typologically diverse languages
Olivier Rüst, Marco Baroni, and Sabine Stoll

Processing clause chains in Nungon
Pelle Söderström and Hannah Sarvasy

Syntactic and semantic restrictions on word formation in isiXhosa: An auditory lexical decision study
Robyn Berghoff, Linnaea Stockall, and Khanyiso Jonas

Cross-linguistic differences in mental-state language and Theory of Mind development: Comparing English, Chinese, and Turkish
Silke Brandt, Birsu Kandemirci, Ditte Boeg Thomsen, and Anna Theakston

Poster Presentations

Neurotypological considerations of temporal concord processing
Aymeric Collart

Processing semantic affix attachment rule violations in South Slavic and Colombian Spanish
Bojana Ristić, Karin Kavčič, Martha Juliana Aponte Niño, Rok Žaucer, Linnaea Stockall, and Christina Manouilidou

Eye-tracking action encoding in spoken production with dynamic stimuli
Caterina Cacioli, Agnieszka Konopka, and Alessandro Panunzi

The processing of Inherent Vowel in Assamese readers
Chandni Khaund

The interplay of functional and semantic aspects in shaping inflectional morphology: a case study on Romance languages
Emily Cheng, and Francesca Franzon

Semantic role processing in 6-year-old Basque children
Arrate Isasi-Isasmendi, Sebastian Sauppe, Caroline Andrews, Martin Meyer, and Balthasar Bickel

How to Create Large Databases for Codeswitched Speech from Public Data
Logan Walls, Natasha Vernooij, Natalie Robbins, and Eric Martell

A processing-based explanation for left-right agreement asymmetries
Omri Amiraz

VO vs. OV basic order triggers different utterance structuring processes and case marking principles
Pavel Ozerov

Differential Object Marking in Romanian-Spanish bilinguals. Using production tasks to explore bidirectional crosslinguistic influence.
Senta Zeugin

Understanding and producing case after local two-case prepositions in German-speaking preschoolers
Tanja Diederich and Flavia Adani

Multilevel phylogenetic inference of harmony in Indo-European
Yingqi Jing, Joakim Nivre, and Michael Dunn

Low-frequency Neural Activity Tracks Semantic Properties of Mandarin Words
Yuan Xie, Peng Zhou, Likan Zhan, and Yanan Xue

and more to be confirmed...
